DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1-4 are rejected under 35 U.S.C. 102(a) as being anticipated by Golovatai-Schmidt et al.

Golovatai discloses a valve comprising:

- Two pole pieces 21, 22;
- An electric core;
- A bearing 12 axially retained in one of the two pole pieces;
- The effective bearing diameter nearly identical as that of the shaft;
- A gap 7;
- An armature 110;
- A shaft 36;
- Gap filled with air 7;
- Where in the armature 8 does not contact the poles (col. 4 lines 40-50);
- The armature is frusto-conical; and
- Attachable to a device providing for linear actuation.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Golovatai.

As mention before the effective inner diameter of Golovatai is nearly identical as the shaft. It would have been obvious to one having ordinary skill in the art at the time of the invention was made to a smaller barring, since it has been held that where the general conditions of the claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

Also the ratio of the baring length to the shaft diameter is considered to be an optimum range decision.

5. Claims 6- 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Golovantai in view of Hussey et al.

Golovantai discloses a valve. Hussey teaches the use of an EGR valve in a combustible engine. It would have been obvious to one of ordinary skill in the art at the time of the invention to use the valve design of Golovantai in the EGR Valve of Hussey as it is just intended use. It has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from the prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ 1964 (1987). All the structural limitations of the valve have been met.

Response to Arguments

6. Applicant's arguments filed 4-14-04 have been fully considered but they are not persuasive. The prior art anticipates renders obvious all the claims.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
